# THIS IS THE RIGHT PLACE

## QUESTO È IL POSTO GIUSTO

The heart doesn't lie and, at first glance, it can recognize the right ambience in which people love finding each other to spend a moment of sincere friendliness. It is a complex and delicate alchemy composed with several ingredients, among which Gaber products have an important priority. Contributing to create this magic atmosphere is our specialty. We do it with competence, devotion and great passion, attempting to improve our products in every detail.

Il cuore non mente e sa riconoscere fin dal primo sguardo l'atmosfera giusta, quella che piace e dove la gente ama ritrovarsi per passare un momento di sincera convivialità. E' un'alchimia complessa e delicata, composta da molti ingredienti, tra questi i prodotti Gaber che hanno un posto di prim'ordine. Contribuire a creare quest'atmosfera magica è nostro compito, la nostra specialità. Lo facciamo con professionalità, dedizione e grande passione, cercando continuamente di perfezionare i nostri prodotti in ogni particolare.

# **IT IS OUR SPECIALTY: COME WITH A DREAM, COME OUT WITH A PROJECT.**

**È LA NOSTRA SPECIALITÀ:  
ENTRI CON UN SOGNO,  
ESCI CON UN PROGETTO.**

Traditional “Made In Italy” rules of design, and a constant view of the world of furniture, have led Gaber® to supply its products to prestigious contract projects. Expertise, innovative technology and customization serving the world of architecture and design: these are the main aspects of the Gaber® contract division. Years of experience in the design of plastic products, manufacturing moulds and tools, metalworking, moulding plastic products, have brought us today to meet the needs of a competitive international market, with due attention to quality and style. In the “contract” field we have established a target, allowing us to offer products that stand out in terms of design and quality, always with particular attention to details. Come with a dream, leave with a project.

Le radici nella tradizione del Made in Italy e lo sguardo proiettato sul mondo hanno portato Gaber® a fornire i propri prodotti per progetti di Contract prestigiosi. Competenza, tecnologie innovative e customizzazione al servizio del mondo dell’architettura e del design: questi i plus della divisione contract di Gaber®. Anni di esperienza nel settore della progettazione di manufatti plastici, nella realizzazione di stampi e attrezzature, nella lavorazione del metallo, nello stampaggio delle materie plastiche, ci hanno portato oggi a confrontarci con un mercato internazionale sempre più competitivo, attento alla qualità e allo stile. Nel settore “contract” abbiamo trovato una dimensione che ci permette di proporre prodotti che si distinguono come design e qualità formale, merito non solo della ricerca costante, ma anche di un livello tecnico superiore e di una particolare attenzione ai dettagli. Entri con un sogno, esci con un progetto.

# AWARDS: SUCCESS IN PROGRESS

Gaber has won multiple design awards including honors from: Red Dot in Essen, Germany; Good Design Award of Chicago Athenaeum, USA; German Design Award, Germany; Interior Innovation Award from the German Design Council in Cologne, Germany; IF International Award from Forum Design of Munich, Germany; FX Award in London, UK; Young & Design in Milan, Italy; Top Ten during Promosedia Udine, Italy. These recognitions are a testament to Gaber's unstinting commitment to design and innovation.

Gaber ha vinto diversi premi di design, tra cui gli onorevoli Red Dot in Essen-Germania, Good Design Award del Chicago Athenaeum-Usa, German Design Award-Germania, InteriorInnovation Award dal German Design Councilin Colonia-Germania, IF International Award dal Forum Design di Monaco-Germany, FX Award di Londra-UK, Young & Design di Milano-Italy, Top Ten durante Promosedia Udine-Italy. I riconoscimenti sono una testimonianza del continuo impegno di Gaber per la progettazione, l'originalità e l'innovazione dei propri prodotti.

Coverings and finishes stimulate and impact on the senses: they are decorations, textures and patterns. Research, technology and developments assist Gaber® in the production of new emotional tactile feelings on surfaces made for Interior Design. This is the *place* where your *articles* are born.

Rivestimenti e finiture superficiali suscitano emozioni e sollecitano i sensi: che si tratti di decori, texture o trame. Ricerca, sperimentazione e tecnologia aiutano Gaber® nella produzione di nuovi effetti tattili ed emozionali per le superfici destinate all'InteriorDesign. Questo è il *posto* dove nascono i vostri *prodotti*.

TKITT is a table collection, suitable for outdoor use. Tables are made with techno polymer tops in different shapes and sizes, combined with technopolymer-metal co-injected bases and anodized columns.

Technopolymer table top colors match perfectly the colors of the Gaber seating collection.

TKITT è una collezione di tavoli adatti anche all'uso esterno. I tavoli sono realizzati con piani in tecnopolimero di varie dimensioni e forme, combinati a basamenti in metallo sovrastampato con tecnopolimero e colonne in alluminio anodizzato. I colori dei piani dei tavoli corrispondono ai colori della vasta collezione di sedute Gaber.

## ABOUT COMPACTOP: MUCH MORE THAN A MERE SURFACE

Gaber Compactops are made of high-pressure laminate, consisting of numerous layers of paper saturated with thermosetting resins and bonded through the combined action of heat and high pressure. The paper used on Compactop (around 70% of the complete composition) comes from production processes that conform with the FSC chain of custody; phenolic and melamine resins are all strictly water-based.

The result is a stable, non-reactive, homogenous, non-porous, antistatic, high-density product with a totally distinct physical and chemical profile from that of its constituent parts. Thanks to the heat and high-pressure treatment it they undergo, Gaber Compactops are exceptionally tough and resistant to scratches, abrasions, chemicals and heat, making them ideal for a wide range of contract applications. Tops come pre-bored for Gaber kit bases.

Gaber Compactops conform to EN 438/1. According to this norm, the most important characteristics of Gaber Compactops are: their resistance to bumps, scratches, and wear and tear; color-fastness; easy cleanability; suitability suitable for contact with food and general hygiene.

## MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

## CHE COS'È IL COMPACTOP? MOLTO PIÙ DI UNA SEMPLICE SUPERFICIE

Il Compactop che Gaber utilizza per i propri tavoli è un laminato realizzato ad alta pressione, costituito da numerosi strati di carta impregnati con resine termoindurenti fenoliche e melaminiche, compattati attraverso l'azione combinata di calore ed alta pressione. Le carte utilizzate (circa il 70% della composizione dei piani) derivano da processi che seguono il protocollo della catena di custodia certificata FSC; le resine fenoliche e melamiche sono tutte rigorosamente realizzate su base acquosa.

Il risultato è un prodotto stabile, non reattivo, omogeneo, non poroso, antistatico e di alta densità. Grazie al trattamento di alta temperatura e pressione cui è sottoposto, il Compactop è un materiale estremamente robusto: resistente a graffi, urti, abrasioni, sostanze chimiche e calore; caratteristiche che lo rendono il materiale ideale per una vasta gamma di applicazioni. I fissaggi dei piani Compactop sono già predisposti per i basamenti Gaber.

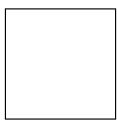

Il Compactop è conforme alla norma EN 438/1, secondo la quale, queste sono le principali caratteristiche di qualità di questo materiale: Resistente all'impatto, ai graffi e all'usura, stabile alla luce, facile da pulire, igienico, adatto al contatto con i cibi.

## MANUTENZIONE E PULIZIA

Il Compactop non richiede alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie compatta e non porosa può essere facilmente pulita e disinfeccata con acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfettanti per uso domestico, purché non alcalini. Sono necessarie solo poche precauzioni, quali l'evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti fortemente abrasivi.

## ABOUT COMPACTOP: MUCH MORE THAN A MERE SURFACE

Gaber Compactops are made of high-pressure laminate, consisting of numerous layers of paper saturated with thermosetting resins and bonded through the combined action of heat and high pressure. The paper used on Compactop (around 70% of the complete composition) comes from production processes that conform with the FSC chain of custody; phenolic and melamine resins are all strictly water-based.

The result is a stable, non-reactive, homogenous, non-porous, antistatic, high-density product with a totally distinct physical and chemical profile from that of its constituent parts. Thanks to the heat and high-pressure treatment it undergoes, Gaber Compactops are exceptionally tough and resistant to scratches, abrasions, chemicals and heat, making them ideal for a wide range of contract applications. Tops come pre-bored for Gaber kit bases.

Gaber Compactops conform to EN 438/1. According to this norm, the most important characteristics of Gaber Compactops are: their resistance to bumps, scratches, and wear and tear; color-fastness; easy cleanability; suitability suitable for contact with food and general hygiene.

## MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

## CHE COS'È IL COMPACTOP? MOLTO PIÙ DI UNA SEMPLICE SUPERFICIE

Il Compactop che Gaber utilizza per i propri tavoli è un laminato realizzato ad alta pressione, costituito da numerosi strati di carta impregnati con resine termoindurenti fenoliche e melaminiche, compattati attraverso l'azione combinata di calore ed alta pressione. Le carte utilizzate (circa il 70% della composizione dei piani) derivano da processi che seguono il protocollo della catena di custodia certificata FSC; le resine fenoliche e melaminciche sono tutte rigorosamente realizzate su base acquosa.

Il risultato è un prodotto stabile, non reattivo, omogeneo, non poroso, antistatico e di alta densità. Grazie al trattamento di alta temperatura e pressione cui è sottoposto, il Compactop è un materiale estremamente robusto: resistente a graffi, urti, abrasioni, sostanze chimiche e calore; caratteristiche che lo rendono il materiale ideale per una vasta gamma di applicazioni. I fissaggi dei piani Compactop sono già predisposti per i basamenti Gaber.

Il Compactop è conforme alla norma EN 438/1, secondo la quale, queste sono le principali caratteristiche di qualità di questo materiale: Resistente all'impatto, ai graffi e all'usura, stabile alla luce, facile da pulire, igienico, adatto al contatto con i cibi.

## MANUTENZIONE E PULIZIA

Il Compactop non richiede alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie compatta e non porosa può essere facilmente pulita e disinfeccata con acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfettanti per uso domestico, purché non alcalini. Sono necessarie solo poche precauzioni, quali l'evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti fortemente abrasivi.

## ABOUT IRON TABLE TOPS

Gaber's Iron table tops are made of composite materials: a non-deformable water-repellent multilayer wood-based core, covered in steel. The slim line result is elegant, stylish and practical. Iron tops come pre-bored for Gaber kit bases. These tough materials make iron tops suitable for indoor as well as outdoor use.

## MAINTENANCE & CLEANING

Gaber's Iron table tops do not require any special maintenance beyond normal cleaning. Its surface can be easily cleaned with a soft cloth dampened with water, even with household cleaning detergent, provided they are not alkaline and generally aggressive. Avoid the use of strong acids or bases, avoid rubbing with abrasive substances or devices.

## COSA SONO I PIANI DEI TAVOLI IRON?

I sistemi Iron che Gaber utilizza per i propri piani dei tavoli sono realizzati da materiali compositi: il cuore del sistema è realizzato con un materiale multistrato, a base legnosa, resistente all'umidità, di grande stabilità. Il rivestimento in acciaio e lo spessore contenuto rendono il prodotto elegante, raffinato e pratico. I fissaggi dei piani Iron sono già predisposti per i basamenti Gaber. Le finiture disponibili lo rendono adatto anche all'uso per outdoor, grazie all'ottimale resistenza agli agenti atmosferici.

## MANUTENZIONE E PULIZIA

I piani Iron di Gaber non richiedono alcuna manutenzione particolare al di là della normale pulizia. La sua superficie può essere facilmente pulita con un panno morbido imbevuto di acqua, anche con detergenti per uso domestico, purché non alcalini ed in genere aggressivi. Evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti abrasivi.

## ABOUT TECHNO POLYMER TABLE-TOPS

The Techno Polymer Compounds Gaber uses on its table tops have high structural, heat and abrasion resistance. Gaber's technopolymer table tops are practical, shock-resistant, colorful and inexpensive.

Gaber technopolymers are non-toxic, stain-resistant, antistatic and UV-resistant and consequently have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of our Natural Environment. Gaber produces plastic injected materials without added chemicals and, as far as possible, recycled pre-used technopolymers are sourced as a base raw material. Technopolymer table top colors perfectly match the colors of Gaber's seating collection.

## MAINTENANCE & CLEANING

The plastic surfaces of Gaber products can generally be cleaned with a cloth and warm water. For the most persistent stains, a small amount of liquid soap diluted in water may be used. Do not use acetone, trichloroethylene, ammonia, alcoholic substances and detergents that contain even just a small amount of these substances. We also recommend avoiding all types of abrasive and solvent substances or rough sponges.

## COME SONO FATTI I RIPIANI IN TECNOPOLIMERO?

I piani in Tecnopoliomeri utilizzati da Gaber per i propri tavoli sono realizzati per mezzo del processo di iniezione plastica. I piani così realizzati sono pratici, resistenti agli urti, colorati ed economici. I compound di tecnopoliomeri utilizzati da Gaber nella realizzazione dei propri prodotti sono caratterizzati da un'elevata resistenza strutturale, termica e all'abrasione. Il tecnopoliomerio è atossico, antimacchia, antistatico e anti-uv: qualità che lo rendono ottimamente resistente agli agenti atmosferici. I tecnopoliomeri utilizzati da Gaber sono integralmente riciclabili, nel pieno rispetto del nostro Ambiente Naturale. Gaber produce articoli termoplastici senza additivi chimici e, ove possibile, vengono utilizzati tecnopoliomeri riciclati derivanti da post-consumo. I colori dei ripiani dei tavoli corrispondono ai colori della vasta collezione di sedute Gaber.

## MANUTENZIONE E PULIZIA

Le superfici in tecnopolimero dei piani dei tavoli Gaber possono essere pulite con un panno umido e soffice imbevuto in acqua. Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido con moderazione. Non utilizzare acetone, trielina, ammoniaca, sostanze alcoliche o detergenti che contengano anche piccole quantità di tali detergenti. Non utilizzare a contatto con il prodotto sostanze abrasive o solventi, strumenti di pulizia ruvidi.

## ABOUT LAMINATED TABLE TOPS

Gaber's laminate table tops are composed of a high-pressure decorative laminate layer, with a recycled-wood chipboard core and ABS edging. Gaber's support materials are E1 according to tests stipulated by the European standards EN717 and EN120 regarding formaldehyde emission. Laminate tops come ready for Gaber kit bases. The result is homogeneous, static, lightweight and highly customizable in terms of shapes and finishes.

## MAINTENANCE & CLEANING

Gaber laminated table tops do not require any special maintenance beyond normal cleaning.

Laminated surfaces can be easily cleaned with a soft cloth dampened with water, even with cleaning agents, but not alkaline and generally aggressive. Avoid the use of strong acids or bases, avoid wiping with abrasive substances or equipment.

## COSA SONO I PIANI DEI TAVOLI IN LAMINATO?

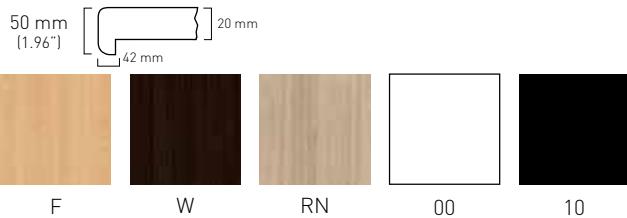

I ripiani laminati che Gaber utilizza per i propri tavoli sono composti da uno strato di laminato decorativo ad alta pressione, supportato da un pannello di truciolare; quest'ultimo realizzato con i materiali di scarto delle normali lavorazioni del legno. I piani sono bordati con bordo in Abs. La tipologia di supporto utilizzato da Gaber per i propri piani è di classe E1 secondo i test espressi dalle normative europee EN717 e EN120 in materia di emissione di formaldeide. I fissaggi dei ripiani in Laminato sono già predisposti per i basamenti Gaber. Il risultato è un prodotto omogeneo, antistatico, leggero e facilmente personalizzabile in forme e finiture.

## MANUTENZIONE E PULIZIA

I piani Laminati di Gaber non richiedono alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie può essere facilmente pulita con un panno morbido imbevuto di acqua, anche con detergenti per uso domestico, purché non alcalini ed in genere aggressivi. Evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti abrasivi.

# LEATHER SURFACES

## ABOUT LEATHER TABLE TOPS

Gaber's leather table tops are made of an extremely stable composite material support, covered with high quality leather. The result is an elegant and refined surface.

## MAINTENANCE & CLEANING

Leather is an extremely delicate material and great care needs to be taken in use. Leather surfaces need to be cleaned with a soft white cloth, and water. If necessary, use high quality products and to follow carefully the instructions of the manufacturer. If it doubt, we suggest you apply any cleaning product to a hidden area of leather and leave for 24 hours to be able to assess any side-effects.

## COME SONO REALIZZATI I PIANI IN PELLE?

I piani in Pelle che Gaber utilizza per i propri tavoli sono composti da un supporto di materiale composito estremamente stabile, rivestito con pelli di assoluta qualità. Il risultato è un prodotto elegante e raffinato.

## MANUTENZIONE E PULIZIA

La pelle è un materiale delicato, pertanto è consigliato prestare cura durante l'utilizzo. I ripiani in Pelle possono essere puliti con un panno bianco umido imbevuto di sola acqua. In caso, utilizzare prodotti di qualità per la pulizia della pelle, seguendo attentamente le indicazioni del fabbricante del prodotto di pulizia. Nel dubbio testare il prodotto su di una parte nascosta e attendere almeno 24 ore per l'eventuale insorgenza di problemi.

## GABER® LITERATURE

All Gaber® literature contains technical information and use-suggestions for those who intend to purchase or already have bought items from the Gaber® range. For Customers' interest, the Company may modify its products without any prior notice. Drawings, quoted materials and catalogue colors and price-lists are shown as a guide only. Dimensions are provided also in inches ("') has a guide only. For very precise measurements, please consider the centimeters values. The colors displayed in Gaber® literature, related to technopolymer finishing and coverings, fabrics, leather, lacquered or painted materials, wooden items, may change from time to time. Gaber® reserves the right to suspend the production of any of its products without any notice or reason. All rights of reproduction in whole or in part of Gaber® literature, related to text, images or illustration, or transmitted by any means, electronic or mechanical, including photocopying, recording or any information storage without written permission from Gaber®, are reserved worldwide

## MATERIALS, USE AND MAINTENANCE

### Plastic Materials

The Techno Polymer Compounds Gaber® uses on its products are characterized by high structural resistance, heat and abrasion resistance. Gaber® technopolymers are non-toxic, scratch and stain resistant, antistatic and UV-resistant: thanks to all these features these materials have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of our Natural Environment. Gaber produces plastic injected materials without added chemicals and, as far as possible, recycled technopolymers are sourced as a base raw material, recovered post-consumption.

Guidelines for correct usage: Do not expose plastic surfaces to direct heat sources. Plastic surfaces of Gaber® products usually need to be cleaned with a normal cloth and warm water. For the most persistent stains, a small amount of liquid soap diluted in water may be used. Strictly avoid the use of acetone, trichloroethylene, ammonia, alcoholic substances and detergents containing even a small amount of those substances. We also recommend avoiding all types of abrasive and solvent substances or rough sponges. Any liquid spilt on the product must be wiped up immediately. Even products made especially for outdoor purposes could be affected by atmospheric agents. Products may undergo exterior changes due to particular exposure to heat, humidity and salinity. Products may change color and shade if exposed to direct sunlight. An appropriate and frequent maintenance and cleaning of the products enhances its durability. Maintenance has to be carried out by experienced staff.

### Steel

High-resistance steel is used to produce frames for chairs, stools and tables by using square or round tubes as well as solid rod. Products are available in chrome or painted finishes. Special epoxy powder coating used on many Gaber® structures achieves excellent resistance to atmospheric agents.

### Aluminum

Gaber® use aluminum to produce frames for chairs, stools and tables. Aluminum surfaces can be anodized, and Gaber® use this special treatment in order to increase resistance to corrosion.

Guidelines for correct usage: both steel and aluminum surfaces usually need to be cleaned with a normal cloth and warm water. For the most persistent stains, a small amount of mild liquid soap diluted in water may be used. Any liquid spilt on the product must be wiped up immediately. We recommend avoiding all types of abrasive creams or pastes, abrasive sponges, chlorine, bleach or strong detergents.

### Wood

Our wooden articles are produced in accordance with the European Regulations in force regarding formaldehyde emissions from wood-based products.

Guidelines for correct usage: Wooden articles, being natural materials, can be damaged easily. Small impurities or imperfections are within quality standard range. Plywood surfaces need to be cleaned with a cloth and water. We recommend drying immediately after the cleaning process.

### Flexible polyurethane padding

The flexible polyurethane cold-pressed paddings Gaber® uses on some of its upholstered articles do not contain CFC/HCFC (ODP=0: do not contribute to the reduction of the atmospheric ozone layer), they are fire-retardant class 1-IM UNI 9175 / CMHR following European Standards.

### Coverings: Fabrics and Leathers

Gaber® uses fabrics and leathers that belong to a wide range of colors and patterns, which are all tested in order to achieve the best performance, among which resistance to abrasion and artificial light. Fire-retardant fabrics and eco-leather upholstery are also available.

Guidelines for correct usage: Clean leathers with a soft cloth with water. Refer to technical specifications for fabric cleaning.

## PACKAGING AND RECYCLING

Our packages are designed to optimize storage and transport requirements, they are made of 90% recycled raw material and are completely recyclable in themselves. The optimization of packaging in terms of volume and weight delivers a lower consumption of energy in many forms, helping the environment and a consequent saving on transport costs. In order to avoid the loss of components, packaging must be disposed only after completing the assembly of the products. Once the product has been dismantled, the product itself or its components must be given to public garbage system, according to local rules.

## INNAPPROPRIATE USES OF THE PRODUCT

Avoid any improper use of the product; do not step on the product, do not stand on footrest or on armrests, do not seat on the back or on armrest, do not use the chair as a ladder. The product should not be subjected to swinging back and forwards that may damage the furniture or result in injury to the user. When lifting or moving the product, hold it by the main structure and not just under the seat. Gaber® will accept no liability for any damages caused to property or persons subsequent to incorrect or improper handling of the product. Gaber® also declines any responsibility in cases of damage caused to fragile floors.

## DOCUMENTAZIONE GABER®

La documentazione Gaber® contiene informazioni tecniche e consigli d'uso per chi vuole acquistare o possiede articoli facenti parte della gamma prodotti Gaber®. Nell'interesse della clientela, Gaber® si riserva il diritto di modificare i propri modelli in ogni momento, senza obbligo di preavviso. I disegni, le quote, i materiali ed i colori dei cataloghi e del listino Gaber® si intendono a titolo puramente indicativo. Le dimensioni in pollici ("") sono da considerarsi indicative. Per misure precise utilizzare le dimensioni in centimetri. I toni di colore rappresentati o presenti nelle palette colori e rivestimenti, relativi ai tessuti, alla pelle, alle laccaiture, ai vetri, e alle essenze legno, sono indicativi, in quanto passibili di variazioni da partita a partita. Gaber® declina ogni responsabilità in relazione a leggere differenze di tonalità. Gaber® si riserva inoltre il diritto di ritirare, sospendere o cessare la produzione di ogni singolo suo prodotto in qualsiasi momento e a sua discrezione senza darne preventivo avviso. Tutti i diritti di riproduzione, anche parziale, di cataloghi e listini Gaber® relativi a testi, immagini, illustrazioni, disegni, sia con mezzi meccanici che elettronici, incluso fotocopie o la formazione di sorgenti di informazione, senza il preventivo permesso scritto di Gaber®, sono globalmente riservati.

## MATERIALI UTILIZZATI E MANUTENZIONE

### Le Materie Plastiche

I compound di tecnopolimeri utilizzati da Gaber® nella realizzazione dei propri prodotti sono caratterizzati da un'elevata resistenza strutturale, termica e all'abrasione. Il tecnopolimero componente dei prodotti Gaber® è atossico, antimacchia, antiraffiglio, antistatico e anti-uv: qualità che lo rendono ottimamente resistente agli agenti atmosferici. I tecnopolimeri utilizzati da Gaber® sono integralmente riciclabili, nel pieno rispetto del nostro Ambiente Naturale. Gaber produce articoli termoplastici senza additivi chimici e, ove possibile, vengono utilizzati tecnopolimeri riciclati derivanti da post-consumo.

Piccole Accortezze: I materiali plastici utilizzati non possono sopportare fonti di calore diretta sulla superficie. Le superfici plastiche dei prodotti Gaber® possono essere pulite con un panno umido e soffice imbevuto in acqua. Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido con moderazione. Non utilizzare acetone, trielina, ammoniaca, sostanze alcoliche o detergivi che contengano anche piccole quantità di tali detergenti. Non utilizzare a contatto con il prodotto sostanze abrasive o solventi, strumenti di pulizia ruvidi. I liquidi versati sul prodotto devono essere asciugati subito. I prodotti destinati all'uso esterno subiscono comunque nel tempo l'azione degli agenti atmosferici. Eventuali alterazioni superficiali possono verificarsi a specifiche condizioni di temperatura, umidità e salinità. Il prodotto se esposto alla luce diretta del sole può essere soggetto a variazioni di colore. Una corretta e frequente manutenzione e pulizia aumentano la durabilità del prodotto. Interventi di manutenzione devono essere eseguiti da personale esperto.

### L' Acciaio

L'acciaio ad alta resistenza è utilizzato nelle strutture di tavoli, sedie e sgabelli, realizzati da Gaber® per mezzo di tubolari a sezione quadrata e rotonda, o con tondino. I prodotti sono disponibili con finitura cromata o verniciata. La speciale verniciatura a polveri epoxidiche utilizzata da Gaber® per alcune strutture dei propri prodotti raggiunge una resistenza ottimale agli agenti atmosferici.

### L' Alluminio

Gaber® utilizza l'alluminio per realizzare le strutture di tavoli, sedie e sgabelli. La finitura per mezzo del trattamento superficiale di anodizzazione, utilizzata in alcuni prodotti, ha lo scopo di aumentarne la resistenza alla corrosione.

Piccole Accortezze: sia le superfici metalliche in acciaio che in alluminio devono essere pulite con un panno umido e soffice imbevuto in acqua calda. Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido con moderazione. Asciugare sempre dopo la pulizia con un panno morbido. Non usare creme o paste per pulire i metalli, non usare cloro, candeggina o detergenti aggressivi. Non usare paste o spugne abrasive che possano graffiare le superfici metalliche.

### Il legno

I prodotti Gaber® con elementi in legno sono prodotti di accordo con le vigenti normative Europee rispetto alle emissioni di formaldeide.

"Compound-wood" è il particolare materiale utilizzato da Gaber® per la realizzazione dei prodotti Alhambra-Eco ed Epica-Eco. Questo materiale utilizza fibre di legno derivanti dagli stessi processi di produzione con cui Gaber realizza elementi in materiale legnoso. Niente viene sprecato.

Piccole Accortezze: Le superfici in legno, essendo un materiale naturale, potrebbero, nel tempo, subire alterazioni di colore con l'utilizzo e con l'esposizione alla luce. Inoltre, per loro natura, tali superfici sono facilmente danneggiabili, alcune piccole impurità e imperfezioni rientrano negli standard di qualità accettati. Le superfici in legno non possono sopportare fonti di calore dirette. Pulire le superfici in legno con un panno umido e soffice, imbevuto in acqua tiepida. Asciugare immediatamente dopo la pulizia.

### Le imbottiture in poliuretano flessibile

Le imbottiture di alcuni prodotti Gaber® sono realizzate in poliuretano flessibile, stampato a freddo, privo di CFC/HCFC (ODP=0 : non contribuisce alla riduzione dello strato di ozono atmosferico), autoestinguente classe 1-IM Uni 9175 / CMHR, seguendo le normative Europee in materia.

### I rivestimenti: tessuti e pelli

Tessuti e Pelli utilizzati da Gaber® appartengono ad un'ampia gamma di colori e trame, tutti scelti tra un range di prodotti testati con l'obiettivo di ottenere le migliori caratteristiche prestazionali, quali la resistenza all'abrasione, allo sfregamento e alla resistenza alla luce artificiale. Sono disponibili categorie di tessuti ignifugi e rivestimenti in finte pelli.

Piccole Accortezze: pulire le Pelli con un panno bianco umido di sola acqua. Per la pulizia dei tessuti consultare la scheda tecnica specifica.

### IMBALLI E RICICLO

I nostri imballi sono realizzati con l'obiettivo di ottimizzare trasporti e stoccaggio; sono realizzati per il 90% di materiali riciclati e totalmente riciclabili. L'ottimizzazione dell'imballo in termini di volume e peso comporta un minore dispendio di energia, con un conseguente risparmio nei costi di trasporto e un importante aiuto alla salvaguardia del nostro Ambiente Naturale. È consigliabile lo smaltimento degli imballi solo a completamento dell'assemblaggio, onde evitare lo smarrimento di eventuale ferramenta e componenti. Una volta dismesso, il prodotto o i suoi componenti vanno conferiti ai sistemi pubblici di smaltimento secondo quanto previsto dalla legislazione locale in vigore.

### USO IMPROPRIOS DEI PRODOTTI

Sono da considerarsi usi impropri e/o scorretti del prodotto il salire in piedi su tavoli, sedie, sgabelli, poggiapiedi, sedersi su schienali, braccioli, utilizzare i prodotti come scaletta. Evitare oscillazioni che potrebbero pregiudicare il funzionamento e la sicurezza dell'utente. Per sollevare o spostare un prodotto non afferrare sotto il sedile, bensì afferrare saldamente la struttura portante. Il prodotto non deve essere sottoposto a carichi decentrati, è stato progettato per essere utilizzato in condizioni normali di appoggio (su quattro gambe o sulla base). Gaber® declina ogni responsabilità per danni causati a cose o a persone derivanti da uso non corretto del prodotto; l'azienda inoltre si solleva da ogni responsabilità per danni provocati su pavimenti e superfici delicate o tenere.

## DOCUMENTACION GABER®

Toda la documentación Gaber® contiene una serie de informaciones técnicas y consejos para el utilizar para quién quiera comprar o para quién posea productos pertenecientes a la gama Gaber®. En el interés de los clientes, Gaber® se reserva el derecho de poder modificar o mejorar sus productos sin avisar antes.

Los dibujos, las medidas, los materiales y los colores se ilustran exclusivamente a modo de ejemplo y son indicativas. Las tonalidades de los colores del muestrario relativas a las telas, pieles, pintura, esencias de las maderas, pueden variar según partida.

Gaber® declina todo tipo de responsabilidades con relación a pequeñas diferencias de color. Gaber® se reserva además el derecho de retirar, suspender o cesar la producción de cualquier producto en cualquier momento y a propia discreción sin dar previo aviso.

Todos los derechos de reproducción, incluso parcial, de los catálogos y listas de precios Gaber® relativos a los textos, imágenes, ilustraciones, diseños ya sea por medios mecánicos o electrónicos, incluyendo el fotocopiado o la formación de fuentes de información, sin el permiso previo por escrito de Gaber®, son reservados a nivel mundial.

## MATERIALES, USO Y MANTENIMIENTO

### Material Plástico

Tecno Polímeros compuestos que Gaber® utiliza en sus productos se caracterizan por una alta resistencia estructural, al calor y una alta resistencia a la abrasión. Los Tecno Polímero de Gaber® no son tóxicos, son resistentes a arañazos y manchas, antiestáticos y UV-resistente; gracias a esto los materiales tienen una excelente resistencia a los agentes atmosféricos. Todos estos materiales son reciclables en el pleno respeto de nuestro medio ambiente. Gaber® produce plástico inyectado sin productos químicos y materiales añadidos y, cuando sea posible, tecnopoliémero reciclados se obtienen como materia prima básica, recuperado de post-consumo.

Pequeñas atenciones a: no exponga las superficies de plástico a fuertes fuentes de calor directo. Las superficies de plástico de los productos Gaber® generalmente necesitan ser limpiados con un paño normal y agua tibia. Para las manchas más persistentes se puede utilizar una pequeña cantidad de jabón líquido diluido en agua. Estrictamente evitar el uso de acetona, tricloroetileno, amoníaco, sustancias alcohólicas y detergentes que contiene incluso sólo una pequeña cantidad de esas sustancias. Se recomienda también para evitar todo tipo de sustancias solventes y abrasivos o esponjas ásperas. Cualquier fracción de líquido sobre el producto debe ser borrado de inmediato. Incluso los productos hechos especialmente para el exterior podrían ser afectados por los agentes atmosféricos. Productos podrían someterse a posibles cambios en la exposición especial al calor, la humedad y la salinidad. En casos excepcionales y para una vida larga, los productos podrían cambiar de tonalidad y sombra, si se expone a fuerte luz solar directa. Un mantenimiento y limpieza adecuada y frecuente de los productos aumenta su durabilidad. Mantenimiento tiene que llevarse a cabo por personal de experiencia.

### Acero

Acero de alta resistencia se utiliza para producir las estructuras de las sillas y de las mesas, utilizando tubos cuadrados o redondos, así como barilla sólida. Los productos están disponibles en cromo o acabados pintados. La pintura en polvo epoxi especial, utilizada en muchas estructuras Gaber®, logra una excelente resistencia a los agentes atmosféricos.

### Aluminio

Gaber® utiliza aluminio, ligero y resistente, para producir estructuras para las sillas y las mesas. Superficies de aluminio pueden ser anodizado, y Gaber® utilizan este tratamiento especial con el fin de aumentar la resistencia a la corrosión.

Pequeñas atenciones a: tanto las superficies de aluminio que acero se deben limpiar con un paño normal y agua tibia. Para las manchas más persistentes se puede usar una pequeña cantidad de jabón líquido suave diluido en agua. Cualquier fracción de líquido sobre el producto debe ser borrado de inmediato. Se recomienda evitar todo tipo de cremas abrasivas o pastas, esponjas abrasivas, cloro, lejía o detergentes fuertes.

### Las Maderas

Nuestros artículos de madera se producen de acuerdo con la normativa europea vigente en materia de emisiones de formaldehído de los productos a base de madera. Gaber utiliza materias primas de madera que vienen exclusivamente de la cadena de custodia PEFC de materiales certificados.

Pequeñas atenciones a: artículos de madera, siendo materiales naturales, podrían dañarse fácilmente. Las pequeñas impurezas o imperfecciones están dentro del rango estándar de calidad. Superficies de madera moldeada deben ser limpiadas con un paño y agua. Se recomienda secar inmediatamente después del proceso de limpieza.

### Espumas

Gaber® utiliza en algunos de sus artículos tapizados una espuma de poliuretano inyectada dentro de un molde, toda las espumas no contienen CFC / HCFC (ODP = 0: no contribuyen a la reducción de la capa de ozono de la atmósfera), y son de clase ignífugo 1-IM Uni 9175 siguiendo Normas europeas.

### Revestimientos: Telas y Piel

Gaber® utiliza tela y piel que pertenecen a una amplia gama de colores y diseños, que son todos probados a fin de lograr las mejores prestaciones, entre las que la resistencia a la abrasión y la luz artificial. Telas ignífugas y para exterior, tapicería en eco-piel, también están disponibles.

Pequeñas atenciones a: limpias pieles con un paño suave con agua. Consulte las especificaciones técnicas de limpieza para las telas.

## EMPAQUE Y RECICLABILIDAD

La gama de productos Gaber® está constituida por la mayor parte de elementos completamente reciclables. Nuestros embalajes se escalan con el fin de optimizar los requisitos de almacenamiento y de transporte, que están hechos de 90% materia prima reciclada y son totalmente reciclables. La optimización de los embalajes en términos de volumen y peso ofrece un menor consumo de energía en muchas formas, ayudando al medio ambiente y el consiguiente ahorro en los costes de transporte. A fin de evitar la pérdida de componentes, el embalaje debe eliminarse sólo después de completar el montaje de los productos. Una vez que el producto ha sido desmantelado, el propio producto o sus componentes se debe dar a sistema público de reciclaje, de acuerdo con las normas locales.

## USOS INADECUADO DEL PRODUCTO

Evite cualquier uso inadecuado del producto; no subir/caminar sobre el producto, no se pare en el reposapiés o en los brazos, no sentarse en el respaldo o en el reposabrazos, no utilice la silla como una escalera. El producto no debe ser sometido a pesos desequilibrados, ya que está diseñado para un descanso adecuado en el punto de apoyo (en cuatro patas o en la base). Cuando levante o mueva el producto, manténgalo en la estructura principal y no sólo bajo el asiento. Gaber® aceptará ninguna responsabilidad por los daños y perjuicios causados a bienes o personas posteriores a un manejo incorrecto o inadecuado del producto. Gaber® se libera de cualquier responsabilidad en caso de daños causados a los suelos frágiles.

## DOCUMENTATION GABER®

Notre documentation contient des informations techniques et des conseils pour l'utilisation des produits, pour les futurs clients Gaber® ou pour qui est déjà en possession d'un produit Gaber®. Dans l'intérêt de la clientèle, Gaber® se réserve le droit de modifier ses modèles, à n'importe quel moment, sans aucun préavis.

Les dessins, les descriptions, les cotes, les matériaux et les couleurs du catalogue et du tarif sont purement indicatifs. Les dimensions en pouce sont indicatives. Pour des dimensions plus précises, il est recommandé d'utiliser les dimensions en centimètre. Les tonalités des couleurs qui sont représentées sur la carte couleur, relatives aux tissus, au cuir, aux polipro, aux essences de bois sont purement indicatives car elles peuvent varier d'un lot à un autre. Gaber® décline toute responsabilité en ce qui concerne toute différence de tonalité.

Gaber® se réserve le droit de retirer, de suspendre ou de cesser la production de tout article, sans aucun préavis. Tout droit de reproduction, même partielle, des catalogue, relatif aux textes, images, illustrations, dessins, par des moyens mécaniques, électroniques, par photocopie, ou autre source d'information, sans le consentement préalable de Gaber®, est réservé.

## MATERIAUX UTILISÉS ET LEUR ENTRETIEN

### Matière plastique

Les billes de technopolymer utilisées par Gaber® pour fabriquer ses produits ont les caractéristiques suivantes : résistance structurel thermique et à l'abrasion. Le technopolymer est non toxique, anti tache, il est anti statique et anti UV ; ces qualités le rendent très résistant aux agents atmosphériques. Le technopolymer est entièrement recyclable, dans le respect de la charte écologique. Quelques informations pour l'entretien : les matières plastiques ne doivent pas être en contact avec une source de chaleur directe. Le liquide versé sur un plateau doit être immédiatement essuyé, les articles réservés à un usage externe peuvent subir à la longue l'action d'agents atmosphériques, tels que la salinité, l'humidité, les rayons de soleil, qui peuvent en altérer la superficie et la couleur. Nous recommandons un entretien régulier ainsi qu'un nettoyage correct et fréquent, ce qui augmentera la durée de vie du produit. L'entretien doit être effectué par des personnes expertes.

### Aacier

L'acier utilisé pour la fabrication des structures de tables, chaises, et tabourets Gaber® est très résistant. Il est travaillé sous forme de tube à section carrée ou ronde. La finition peut être chromée ou vernis. Le vernissage spécial à époxy, utilisé par Gaber®, a une résistance optimale aux agents atmosphériques.

### Aluminium

L'aluminium anodisé utilisé pour la réalisation de structures de tables, chaises et tabourets augmente la résistance à la corrosion. Conseil d'entretien pour les surfaces en acier et/ou en aluminium: nettoyer avec un chiffon doux, humide, imprégné d'eau chaude. Pour les taches éventuelles, on peut ajouter un peu de détergent à usage domestique. Il est recommandé de bien sécher la surface ensuite. Il ne faut pas utiliser de pate et/ou crème pour métal, il ne faut pas utiliser de chlore, de javel ou autre détergents agressifs. Il ne faut pas utiliser de pate ou d'éponges abrasives, qui pourraient endommager en les rayant, les superficies.

### Bois

Les articles Gaber® avec bois, sont fabriqués selon les normes européennes en vigueur, sans formaldehyde. (par rapport à l'émission de formaldehyde). Le matériel utilisé pour la fabrication des articles ALHAMBRA ECO et EPICA ECO est un mélange de sciure de bois rendu compact et dérivant de matériel recyclé. Il n'y a ainsi aucun gaspillage. Le bois étant une matière naturelle, peut, avec le temps et suivant l'exposition à la lumière, subir de légères modifications au niveau de la couleur. Ces produits, de par leur nature, peuvent s'abîmer facilement ; nous tenons aussi à préciser que certaines imperfections correspondent à un standard normal de qualité. Il est recommandé enfin, de ne pas approcher la superficie à une source de chaleur directe. Les superficies se nettoient à l'aide d'un chiffon doux, légèrement humide. Sécher toujours ensuite.

### Rembourrage en polyuréthane « flexible »

Le rembourrage de certains articles Gaber® est réalisé en polyurethane « flexible », injecté à froid, sans particules de CFC/HCFC (ODP=0 , ne réduit pas la couche d'ozone), ignifugé en classe 1-IM UNI 9175 / CMHR, selon les normes européennes en vigueur.

### Revêtement : tissus et cuir

Gaber® a au choix une large gamme de couleurs et de trames, choisis parmi des tissus, des cuirs, des ecopelle testés et garantissant une bonne résistance aux frottements, aux abrasions, à la lumière artificielle. Nous avons aussi une gamme de revêtements non feu.

Informations et entretien : nettoyer les peaux avec un chiffon blanc, légèrement humide. Pour l'entretien des tissus, consulter la fiche technique, spécifique.

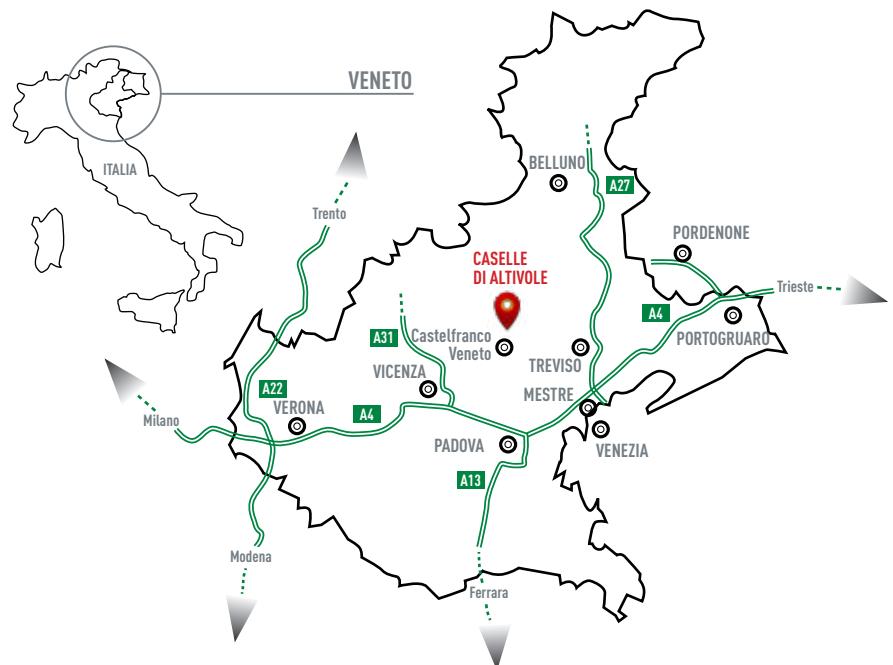

### EMBALLAGE ET RECYCLAGE

Nos emballages sont conçus de façon à optimiser le transport et le stockage ; ils sont réalisés à 90% avec du matériel recyclé et sont complètement recyclables. L'emballage, optimisé au maximum en ce qui concerne son volume et son poids, permet une économie d'énergie, de main d'œuvre et de cout de port, sans oublier la sauve garde de notre environnement. Il est vivement conseillé de monter complètement l'article Gaber® avant de procéder à l'élimination du carton, ceci, afin d'éviter de perdre la visserie et / ou les divers composants de l'article en question. Lorsqu'un produit Gaber® arrive en fin de vie, il est recommandé de porter les diverses parties qui le compose à la déchèterie, selon la loi du pays en vigueur

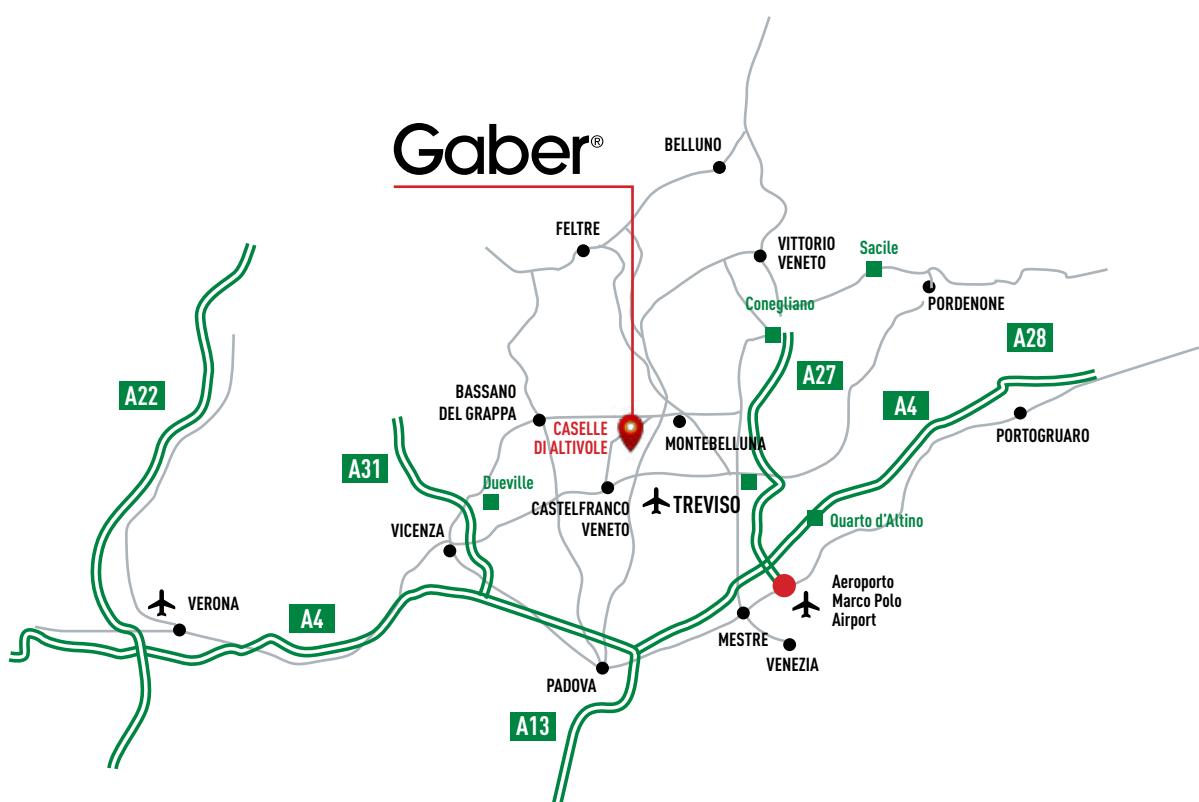

### USAGE INCORRECT DES PRODUITS

Les tables, chaises, tabourets ou repose pieds ne sont pas fait pour monter dessus, il ne faut pas s'asseoir sur les dossier ou les accoudoirs ou se servir de ces articles comme d'un escabeau. Il faut éviter de se balancer d'avant en arrière sur les assises, de façon à éviter les accidents. Pour soulever ou déplacer une chaise ou tabouret, il est recommandé de le prendre par le châssis et non par l'assise. Le produit ne doit pas être soumis à des charges excessives ou décentrées, il a été conçu pour un usage normal de simple appui (sur 4 pieds ou sur pied central).

Gaber® décline toute responsabilité pour les dommages causes à personne ou choses, qui pourraient dériver d'un usage incorrect du produit. L'usine décline aussi toute responsabilité pour les dommages sur parquets ou sol délicats.
