

One-seater Cumulus can have backrests of three different heights with convex surfaces produced of molded polyurethane details. The lowest part of the backrest has a bulkier cushion to ensure more comfortable back support. Optionally you can have a table with a swivel table top. It is attached to the feet frame with two bolts. For one-seater model the table can be attached either to the left side or to the right side. The model has a space for power socket in the seat. Cumulus construction comprises a separately produced backrest and a seat which allows you to combine two colour cover fabrics. Separate Cumulus segments without one side panel can be arranged into groups in a zigzag form or into a circle.
